Profile Summary

- A competent professional with **9 + years** of experience in **Mobile Application Development and Project Execution**.
- Proficiency in mapping business requirements, technical documentation, design, development and troubleshooting for Mobile and web application Development
- Competent in end-to-end development of applications from requirement analysis to system study, designing, coding, testing, documentation and implementation
- Successfully developed and designed number of projects.
- Proficient in suggesting appropriate technology-based solutions for enhancing functional efficiency and achieving business excellence.
- Skilled in functional analysis, mapping of requirements to design, database design and preparation of functional specifications.
- Team-based management style coupled with the zeal to drive visions into reality

Technical Skills

Operating Systems:	Mac OSX/Windows
Languages:	Swift, React-Native, React JS, Node
Databases:	SQL, SQLite, MMKV,
Tools:	Azure-Devops, AppInsights, Sonar, ServiceNow
Framework:	Redux, Jest, MQTT, APNS, FIREBASE,
Mobile Technologies:	iOS, Android
Operating Systems:	Windows and Mac
Database Programming:	SQL, SQLite, MMKV
IDE:	VSCode, XCode, Android Studio
Control Version (Repository Management):	Git, Bitbucket, Gitlab

Organisational Experience

marc'22 -Till Date

IBM, Bangalore

(Developed and involved with development of application)

- Engaging in design & development of software and mobile applications
- Analyzing user requirements in order to understand the problem domain and to suggest the alternatives available for a solution to them
- Monitoring projects from conceptualization and visualization to technology mapping and final execution
- Tracking project key objectives, critical path milestones, and overall project status; initiating actions to identify and resolved project problems/issues
- Developing and implementing most complex and challenging modules/tasks of all projects undertaken; resolving most critical defects and technical issues

Dec'18 – Mar' 2022

Tata Technologies, Pune

(Developed and involved with development of application)

Key Result Areas:

- Engaging in design & development of software and mobile applications
- Analyzing user requirements in order to understand the problem domain and to suggest the alternatives available for a solution to them
- Monitoring projects from conceptualization and visualization to technology mapping and final execution
- Tracking project key objectives, critical path milestones, and overall project status; initiating actions to identify and resolved project problems/issues
- Developing and implementing most complex and challenging modules/tasks of all projects undertaken; resolving most critical defects and technical issues
- Spearheading resource allocations and setting up of the communication channels across various horizons of the organization structure
- Designing, developing, testing, troubleshooting and debugging of the applications; ensuring smooth implementation and testing of the application at client location and providing post-implementation, enhancement and maintenance support to client for application

Nov'17 – Nov'18

Polosoft Technologies, Bhubaneswar as Software Engineer

(Developed and designed number of projects in iPhone and Android)

Key Result Areas:

- Engaging in design & development of software and mobile applications
- Analyzing user requirements in order to understand the problem domain and to suggest the alternatives available for a solution to them
- Monitoring projects from conceptualization and visualization to technology mapping and final execution
- Tracking project key objectives, critical path milestones, and overall project status; initiating actions to identify and resolved project problems/issues
- Developing and implementing most complex and challenging modules/tasks of all projects undertaken; resolving most critical defects and technical issues
- Spearheading resource allocations and setting up of the communication channels across various horizons of the organization structure
- Designing, developing, testing, troubleshooting and debugging of the applications; ensuring smooth implementation and testing of the application at client location and providing post-implementation, enhancement and maintenance support to client for application

Jun'15 – Nov'17

Andola Soft PVT LTD as Junior Software Developer

(Developed and designed number of projects in iPhone)

Key Result Areas:

- Managed projects involving resource planning, team building and delivery in the stipulated budget while ensuring customer interest and requirements
- Headed all phases of the project life cycle inclusive of scoping, development, integration, deployment, testing, maintenance and production support
- Mapped client's requirements and provided them best solutions involving evaluation & definition of scope of project and finalization of project requirements
- Ensured timely completion & delivery of project to the client and extending production support of multiple applications

Education

B.Tech 2013	G.I.E.T.,Bhubaneswar (ETC) from BPUT, Orissa
Diploma 2010	S.I.T.E., Balangir, from SCTE & VT Orissa
Xth 2007	S.S.V.M, Balangir from BSE, Orissa

Personal Details

Date of Birth: 18th December 1991

Languages Known: English, Hindi and Oriya

Address:C/O -Nayan Ranjan Khamari, Sumit Kumar Khamari, Barpalipara, Post- Balangir, Odisha

Annexure

Projects:

Title: UBI-Vyom

Team Size: 10

Technology: React Native, VS Code, Typescript, SQLite, RestAPI

Project Description: Union Bank of India digital mobile banking app

Roles and Responsibility: Working as a Module lead for BBPS, Govt. Schemes, Mutual Fund and Insurance

Title: Irish Water

Team Size: 6

Technology: React Native, VS Code, Typescript, GraphQL, MMKV

Project Description: Irish Water, is a state-owned water utility company in Ireland. It was created by the Irish Government in 2013 as a subsidiary of Bord Gáis. Water and wastewater services were previously provided by local authorities in Ireland.

Title: CSAT

Team Size: 4

Technology: React Native, VS Code

Project Description: CSAT is Customer Satisfaction, which is a commonly used key performance indicator used to track how satisfied

customers are with your organization's products and/or services

Title: Planner
Team Size: 2

Title: VMS
Team Size: 2
Technology: React Native, VS Code
Project Description: Visitor Portal will be used by all TTL employees to raise requests for visitors which is used all over the globe and is configured on employee's location

Title: CIS
Team Size: 2
Technology: React Native, VS Code
Project Description: CIS is designed for contractual employee in the Tata Technology for their complete transaction from time booking to PO (Purchase Order) invoice generation. This process includes different systems like iPMS, SAP, HR, Finance.

Title: BargainAppy
Team Size: 2
Device: Iphone, iPad
Technology: Swift, VSCode
Project Description: This is a hotel room booking application. This application is in production. PsyUMoney – Payment integration

Title: BargainAppy-Admin
Period: May'18 - Present
Team Size: 2
Device: Iphone, iPad, android
Technology: Swift, VSCode
Project Description: This application is for hotel owner to check and manipulate the hotel bookings.

Title: JAMAR
Team Size: 2
Device: iPad
Technology: Swift in Xcode 10.0
Project Description: Application that can connect to a dynamometer
Link to iTunes: <https://itunes.apple.com/in/app/jamar/id980988835?mt=8>

Title: SXBlueToolBox

Team Size: 2
Device: Iphone, iPad
Technology: Objective-C in Xcode 9.2
Project Description: This is a viewer utility that allows users to view the incoming GPS data and allows users to connect to external SXBlue GPS Device

Title: myCircadianClock
Team Size: 4
Device: Iphone
Technology: Objective-C in Xcode 7.2
Project Description: This app is for use in research studies examining how diet, exercise and sleep affect health and healing. Our body contains circadian (circa – approximately and dian – day) or 24 h clocks that determines the time to sleep, feel hungry or get ready for physical activity. Research studies run in different locations are trying to understand the interaction between “how much” and “when” we sleep, eat or exercise for better health. You need an activation code from these research studies to download and use the app.
